

BLACK MARROW LIBRARY
INTERNAL MEMORANDUM

POSTED
BL **DATE: 4/22/25**

DATE: 17 April 2025

TO: Staff and Volunteer Personnel

FROM: Records and Systems Administration

SUBJECT: Migration of Public Website and Digital Holdings

Beginning 14 April 2025, the Black Marrow Library initiated the transfer of its public website and associated digital holdings from the legacy hosting environment to a new service provider.

The migration was undertaken due to increasing compatibility issues with the previous hosting platform, including unsupported software components and intermittent access failures.

During the transfer process, several issues were identified:

- Incomplete directory indexing within certain archive folders.

- Corruption of several image and PDF files during transfer.
- Missing hyperlinks resulting from changes to directory structure.
- Inconsistent metadata associated with pre-2008 uploads.
- Loss of certain visitor counter and guestbook records.

POSTED
BL 4/22/25

The following directories require additional review:

/files/periodicals/

/catalog/legacy/

/staff/notices/

/accessions/1998/

At present, it is believed that the majority of missing materials consist of duplicate scans, obsolete versions of forms, and administrative records of limited historical value.

Several files presently remain inaccessible due to corruption or incomplete transfer. These files will either be restored from backup media or removed from public indexing as appropriate.

Users may encounter:

- Broken hyperlinks
- Missing image files
- Incomplete PDF documents

- Inaccurate dates
- Temporary catalog inconsistencies

POSTED
#BL 4/22/25

The Library regrets any inconvenience resulting from the migration process.

Questions regarding specific records or inaccessible materials should be directed to Records Administration.

Migration Status: IN PROGRESS

Estimated Completion: Undetermined

Revision: 1.2
